LMS (Learning Management System)
Computer System Technology

User Stories

1. I like to switch between the number of tabs by switching with bunch of softwares at the same time.
2. I would like to access a number of analytics templates for free with designs along with an error correction tools like grammarly.
3. I would like to have time-efficient performance management and development tools without any cramps.
4. I would like to have learners can create their temporary rooms for a learning atmosphere where they can exchange information smoothly.
5. Students can access all course materials as well as other helping modules including one on one doubt clearing sessions by tracking their annual performance.
